

HYDROCOOLERS

6 MODELS: 20 - 120 tons

APPLICATION:

Hydrocoolers are used in industrial applications for chilling a liquid to near its freezing point. Normally these coolers are used in systems where water is the liquid being chilled. A typical application is to chill process water used to take field heat out of produce.

FEATURES:

Tubes: Copper, Aluminum, Stainless Steel, Galvanized Steel

Frame: Tube sheets and braces constructed from heavy gauge mill galvanized steel, stainless steel, or aluminum.

Circuiting: Coils are circuited for any working fluid (ammonia, freon, brine)

OPTIONS AND ACCESSORIES:

- Stainless Steel Tubes
- Stainless Steel or Aluminum Casing
- Glycol or Brine Circuiting
- Custom Sizes
- Special circuiting arrangements
- Hydrocooler tanks available
