NEWS RELEASE

Colville, WA. – Colmac Coil Manufacturing is pleased to announce the promotion of Joe Fazzari as Vice President.

In addition to managing the Colmac Sales, Manufacturing, and Production departments, Fazzari oversees strategic planning processes, business development and is responsible for new product selection for the company.

Fazzari joined Colmac Coil as an Applications Sales Engineer in 2002, specializing in industrial refrigeration and heat transfer coil applications. Prior to joining Colmac he worked as a Project Engineer at Weyerhaeuser and Potlatch.

He was promoted to Colmac Sales and Marketing Manager in 2006 where his responsibilities included Sales Engineering and management of the company's international representative network.

Fazzari is a graduate of Washington State University with a B.S. degree in Mechanical Engineering and a registered Professional Engineer (P.E.) in the state of Washington.

Founded in 1971, Colmac Coil's 215,000 sq. ft. manufacturing plant, corporate offices, and testing facilities are located in Colville, Washington. Colmac manufactures heating/cooling coils and fluid coolers for the commercial HVAC/R and industrial process applications; refrigeration evaporators and air-cooled condensers for the heavy commercial and industrial refrigeration markets; air-to-air heat pipe heat exchangers and heat pump water heaters for the international energy recovery markets.
