

# TRIPLE PITCH DRAINPAN

## STOP WASTING TIME AND MONEY DE-ICING DRAINPANS

Ice buildup in air cooler drainpans wastes time and money! Colmac has developed a number of unique technologies that eliminate the need for de-icing the drainpan:

### FEATURES & BENEFITS

- Triple pitch design completely clears water after defrost
- No low spots or pooling of water
- Full radius inlet to drain connection
- Single drain connection at end of pan
- Hot gas loop with continuous full length contact
- Hot gas loop piping designed to quickly clear defrost ammonia condensate

### THE PERFECT PAN

Pitching the drainpan in three directions (front to center, rear to center, and end-to-end) combined with continuous hot gas loop contact has resulted in “the perfect pan”!

**Heating and  
Cooling Coils**

**Heat Pipes  
for Heat  
Recovery**

**A+Series™  
Air Coolers**

**Air Cooled  
Condensers**

**Dry Coolers  
for Glycol or  
Gas Cooling**
