Colmac Coil Presents New Technology at IIAR 2016

Orlando, FL: Colmac Coil proved once again to be a leading innovator in the industrial refrigeration market by showcasing their latest technologies with ADX Advanced Direct Expansion Ammonia at the recent IIAR Trade Show in Orlando Florida. Their latest addition to the A+Series™ Air Cooler line and their Advanced Direct Expansion technology confirm their commitment to safety in the food processing industry from the warehouse to your table.

“Our company has developed a number of technologies with the purpose of making what we do safer for the environment, the public, and for workers who are working in the types of facilities we provide equipment for,” remarked Bruce Nelson, President of Colmac Coil, in a recent booth tour video.

Other highlights of the show included presentations and training sessions of Colmac’s one of a kind Refrigeration Load Simulator Software.

###

About Colmac Coil Manufacturing, Inc.

Since 1971 Colmac Coil has provided customers worldwide with innovative heat exchangers and heat transfer solutions for industrial refrigeration, HVAC, power generation, and gas compression applications. The company builds heating and cooling coils, refrigeration air coolers and blast freezers, air-cooled fluid coolers and condensers, and heat pipes for heat recovery. State-of-the-art selection software accurately calculates heat exchanger performance for a wide range of working fluids, materials, and operating conditions. World-class manufacturing facilities in both Washington State and in Illinois provide customers with fast delivery times and outstanding after sales support. www.colmaccoil.com
