# A+Series™ Air Coolers

**A+D** Low Profile Dual Discharge

**A+B** Stand Alone Coil Block With Drainpan

**A+M** Medium Profile

**A+E** Industrial Quality for  
Commercial Applications

**A+P** Penthouse Unit

**A+L** High Profile

**A+S** Low Profile

**A+R** Process Rooms

Colmac Coil's A+Series™ air coolers for industrial refrigeration applications offers a wide range of cabinet construction materials and are available with cleanability features built-in as standard.

A+Series™ coil construction materials are available to suit any working fluid or environment:

- Aluminum tubes/aluminum fins
- Stainless steel tubes/aluminum fins
- Stainless steel tubes/stainless steel fins
- Stainless steel tubes/anti-microbial alloy fins
- Galvanized steel tubes and fins

Three unique tube and fin patterns are used to optimize the cooling performance of Colmac Coil A+Series™ air coolers depending on the capacity, working fluid, and operating temperature specific to your application. Online software accurately selects, rates, prices, and specifies A+Series™ air coolers. A+Pro software runs on your internet browser.
