

A+D Air Cooler

Custom Engineered Solutions from “The Heat Transfer Experts”

- ▶ Low Profile Dual Discharge
- ▶ Low Velocity Airflow for Highly Perishable Products
- ▶ Ideal For Work Rooms With Low Ceilings
- ▶ Low Noise Fans With High Efficiency Motors

Colmac Coil's A+Series™ air coolers for industrial refrigeration applications offers a wide range of cabinet construction materials and are available with cleanability features built-in as standard.

A+Series™ coil construction materials are available to suit any working fluid or environment:

- Aluminum tubes/aluminum fins
- Stainless steel tubes/aluminum fins
- Stainless steel tubes/stainless steel fins
- Stainless steel tubes/anti-microbial alloy fins
- Galvanized steel tubes and fins

Three unique tube and fin patterns are used to optimize the cooling performance of Colmac Coil A+Series™ air coolers depending on the capacity, working fluid, and operating temperature specific to your application. Online software accurately selects, rates, prices, and specifies A+Series™ air coolers. A+Pro software runs on your internet browser.
