### ***Refrigerated & Frozen Foods Magazine Features Colmac Technology***

**Colville, WA:** Colmac Coil has once again proved to be an innovator in refrigeration controls and equipment technology development. The latest issue of Refrigerated & Frozen Foods magazine highlighted the patent-pending technology behind the Return Air Defrost Hood alongside other cutting edge technology in the industry.

The Return Air Defrost Hood is an optional feature on all A+Series™ air coolers which captures and uses a majority of the heated air used to defrost air coolers. This technology reduces frost formed on ceilings and walls and helps to save energy by defrosting the freezer faster and more completely.

### **About Colmac Coil Manufacturing, Inc.**

Since 1971 Colmac Coil has provided customers worldwide with innovative heat exchangers and heat transfer solutions for industrial refrigeration, HVAC, power generation, and gas compression applications. The company builds heating and cooling coils, refrigeration air coolers and blast freezers, air-cooled fluid coolers and condensers, and heat pipes for heat recovery. State-of-the-art selection software accurately calculates heat exchanger performance for a wide range of working fluids, materials, and operating conditions. World-class manufacturing facilities in both Washington State and in Illinois provide customers with fast delivery times and outstanding after sales support.
