### *Fiberglass Drainpans Offer Exclusive Benefits*

**Colville, WA:** Colmac Coil has developed a new option for a lighter, more hygienic drainpan. The new fiberglass drainpans will be available on all A+ Series™ air coolers with air defrost.

Compared to a metal welded drainpan, the fiberglass alternative offers improved cleanability and sanitation due to the smooth surface and ¼” radius corners. Because the fiberglass material does not have any hollow bodies bacteria cannot become trapped. This material is also food safe and USDA approved.

Fiberglass is also a lighter weight option when compared to a welded insulated drainpan with heat trace. In many cases active heating is not required in order to prevent condensation from forming on the drainpan. Because of this the installation of the drainpan is made easier and less expensive.

To learn more about fiberglass drainpans and how they can meet your needs [contact us](#) today.

### **About Colmac Coil Manufacturing, Inc.**

Since 1971 Colmac Coil has provided customers worldwide with innovative heat exchangers and heat transfer solutions for industrial refrigeration, HVAC, power generation, and gas compression applications. The company builds heating and cooling coils, refrigeration air coolers and blast freezers, air-cooled fluid coolers and condensers, and heat pipes for heat recovery. State-of-the-art selection software accurately calculates heat exchanger performance for a wide range of working fluids, materials, and operating conditions. World-class manufacturing facilities in both Washington State and in Illinois provide customers with fast delivery times and outstanding after sales support.
