Colmac Freezers Used for Fish Processing in Alaska

Valdez, AK: Colmac Coil is proud to be the refrigeration provider of choice for a state-of-the-art project in Alaska. Silver Bay Seafoods, based in Sitka, Alaska, has built a new 64,679 sq. ft. facility in Valdez to process pink salmon and wild salmon caviar.

The highly automated facility required a number of custom requirements including advanced earthquake construction technology, a power supply capable of delivering 7 Megawatts of power, and a high end refrigeration system. Colmac worked alongside SubZero Contractors and Air Treatment Corp to meet the needs of the advanced refrigeration system. Two tunnel freezers and a plate freezer are capable of freezing 130,000 round pounds of salmon per hour.

###

About Colmac Coil Manufacturing, Inc.

Since 1971 Colmac Coil has provided customers worldwide with innovative heat exchangers and heat transfer solutions for industrial refrigeration, HVAC, power generation, and gas compression applications. The company builds heating and cooling coils, refrigeration air coolers and blast freezers, air-cooled fluid coolers and condensers, and heat pipes for heat recovery. State-of-the-art selection software accurately calculates heat exchanger performance for a wide range of working fluids, materials, and operating conditions. World-class manufacturing facilities in both Washington State and in Illinois provide customers with fast delivery times and outstanding after sales support. www.colmaccoil.com
